THE CHALLENGE

Cloud access replaced email-heavy HR

International multidisciplinary consultant JT & Partners (JT+P) offers a unique portfolio of architecture, planning, engineering, project management, infrastructure and cost consultancy services. Specialising in hospitality, residential, commercial, mixed-use projects and master-planning developments, the team offers international design standards with local capability.

SUPPORT, LEAVE AND PAYROLL

JT & Partners approached Yomly looking for a user-friendly HR platform that was cloud-based and accessible from anywhere in the world. The team's main aim was to streamline their HR processes, moving away from a reliance on emails and reducing the amount of admin-related tasks for the HR team. When asked what made Yomly stand out, HR Manager Ghada Tabet commented, "I was impressed by the incredible support that the Yomly team offered and how easy the platform was to navigate. The Leave module was very attractive to us, thanks to the many benefits it could offer to our whole team. Payroll was another very appealing element of the Yomly platform, offering an automated and efficient solution to running payroll, ensuring accuracy and minimising time-consuming admin tasks."

"Thanks to the assistance of the Yomly team, we managed to create a customised platform, based on the unique needs of our business. The entire HR module in the Yomly platform has impressed me, it's great to have an efficient system that works to support our team."

THE SOLUTION

A customised platform built around the business

CUSTOMISATION AND IMPACT

The Yomly team were delighted to implement a customised platform for JT & Partners. "Thanks to the assistance of the Yomly team, we managed to create a customised platform, based on the unique needs of our business," Ghada remarked. "The Yomly team were on hand to support with any request that we had, adapting to the evolving needs of the project. Since implementing the Yomly platform, we have seen a dramatic increase in productivity and efficiency. Our record-keeping is now automated and reliable. We have also linked the system to our attendance tracker, meaning that our clock-in/out system is fully automated and effective. The entire HR module in the Yomly platform has impressed me, it's great to have an efficient system that works to support our team."
