CHALLENGE AND SOLUTION

Visibility replaced manual HR friction

THE CHALLENGE

Before adopting Yomly, Lufthansa Technik Middle East faced time-consuming manual HR processes. Employee information was difficult for managers to access, and HR tasks like leave tracking and document handling required significant manual effort.

THE SOLUTION

Yomly helped streamline internal operations by providing better visibility and speed across HR processes. Managers now enjoy transparent access to their team's leave balances, documents, and growth paths. For the HR team, the platform simplified day-to-day tasks such as issuing letters and managing leave.

"Yomly has significantly improved our internal HR operations. Managers now have clear visibility over their team's leave balances, documents, and growth, which has made day-to-day management much easier. For the HR team, the platform has helped us move faster—especially with tasks like letter issuance and leave tracking. It's a user-friendly system that offers a quick and transparent overview of the information we need."

HR Team, Lufthansa Technik Middle East

IMPACT AND FINAL THOUGHTS

Practical gains, with room to grow

IMPACT HIGHLIGHTS

- Increased transparency for managers regarding employee details
- Faster processes for leave approvals and document issuance
- Improved usability for HR teams with a more centralised overview

FAVOURITE FEATURES

- Leave Module – Easy tracking and management of team leave
- Announcement Page – Central hub for internal updates

FINAL THOUGHTS

While the team is still getting used to the platform, they find it user-friendly and intuitive. Lufthansa Technik Middle East believes Yomly is a promising tool with strong potential, particularly if future updates address more of the basic functionality expected from a comprehensive HR system.
